

Friends of the Earth Member Survey**Energy and Transportation**

3. *We are working hard to prevent increased oil drilling and development of false solutions such as expanded nuclear power. We believe there are many alternatives that can cut greenhouse gas emissions and help us move as quickly as possible away from carbon based fuels. In your opinion, which are the most important areas that Friends of the Earth should concentrate on to wean the U.S. off of oil? (Please check only two.)*

- | | |
|--|---|
| <input type="checkbox"/> More fuel-efficient vehicles | <input type="checkbox"/> Energy efficient buildings |
| <input type="checkbox"/> More and better public transportation | <input type="checkbox"/> Less long-distance shipping for consumer goods |
| <input type="checkbox"/> Access to sustainable alternative fuels | |

Other (please specify)
